British Council)

Profile

Frontend developer passionate about creating attractive and functional user experiences. Although I don't have formal work experience, I have developed many personal projects using HTML, CSS, JavaScript, and React. I am currently studying Computer Engineering at the University Gran Mariscal de Ayacucho, where I learn about the fundamentals of programming, software design, and databases. I consider myself a self-taught and curious learner, always ready to face new challenges and improve my skills. My goal is to become a professional capable of adding value to any web development team.

Achievements

Creation of many responsive and accessible websites that can be viewed on [my portfolio](#).

Good teamwork on many projects at my university.
